

# Our Story

P80 AIR is low fare airline, owned by Thoresen Group with its head office located at 8th floor, Orakarn Building. On February 23rd 2022, Thoresen announced its intention to establish a low fare airline subsidiary for short and medium haul routes.

On 31st August 2023 P80 AIR already have Air Operator License and expect to launch its first flight on the 3rd quarter of 2024.

# Core Values

Low fares: value for money and efficiency. Full flight services to our customers without compromising our safety and comfort.

Integrity: go out of our way to do the right thing. All employees, partners, supplier and contractor are a part to support P80 AIR to be a safe and ethical company by reporting any knowledge of improprieties, malpractices, misconduct or fraud.

Different: Dare to change, dare to perform. Open mind and welcoming new ideas, argument and information.

# Vision

“P80 AIR’s objective is to firmly establish as leading low fares airline continue improvements and offering premium services.”

To establish and continuous improving our services, reducing ticket prices, offering suitable travel packages, and maintaining service efficiency. Our company aims to perform well on all fronts for sustaining success and taking forward. Whether customer service, frequency of flights, onboard experience, passenger’s safety, business management, finances management, organizational management, HR functions or any other thing that matters

# Mission

“To offer low fares that generate increased passenger traffic while bringing efficiency in operation and focus on cost containment”

To provide low – fare price to our customers without compromising our safety and comfort. Also, we focused on the company’s cost management by ensuring that the yearly revenues were profitable. Additionally, P80 AIR envisioned becoming a futuristic airline company that offers premium services.

Under the leadership vision of Chairman Mr. Prayudh Mahagitsiri and CEO Mr. Chalermchai Mahagitsiri, our mission is "To offer low fares with premium services that generate increased passenger traffic while bringing efficiency in operation and focus on cost containment."
